

# Dynamic Leadership Skills for Better Project Results

## *A Sixth Sense for Project Management® Program*

### *An 8 PDU Interactive Workshop*

---

#### Overview

You don't need to be a CEO to be a leader. Quite often Project/Program Managers are viewed as leaders, but often lack formal "position authority." Furthermore, research clearly shows that leadership is one of the most important and determining factors in the success of any project. So what are you to do?

In this course, you will gain an understanding of your power, influence, and formal/informal authority. We'll combine this with our 3A model - Assess, Adjust and Act – to help you lead your team more effectively based upon the situation and obtain better project results.

#### Objectives

We have combined our hands-on experience leading high performing project teams with the latest Leadership research to create this interactive workshop, where you will:

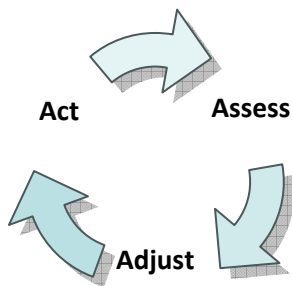

- ▽ Learn various leadership styles and when to use them
- ▽ Understand power, influence, and formal/informal authority
- ▽ Increase your awareness as a leader, to your team, and your project
- ▽ Gain techniques for reading and leading any type of project

#### Benefits

By using the take-away skills from this course, you will be able to immediately:

- ▽ Lead your teams more effectively by adjusting your leadership style to the situation
- ▽ Act more confidently as a leader by being more aware
- ▽ Avert potential project blockers and gain team commitment by diplomatically influencing others
- ▽ Positively impact your project success and personal growth

#### Program Overview

Our experienced experts will lead you through our "3A" model, giving you skills to lead any type of project.

**Assess** - Learn to read the leadership context

**Adjust** - Learn how to be a "situational leader" - read the situation & adjust your leadership style accordingly

**Act** - Learn and practice the behaviors possessed by successful change leaders

### Course Feedback

*"This was the best course I've attended in a long time. Instructors were entertaining and knowledgeable. Lots of take-aways and real life applications."*

– Sharon Noll, Manager IT Planning and Analysis

*"This course was a wonderful overview of the Sixth Sense of leadership. Take it and you'll be looking to dig deeper in specific areas of soft skills."*

– Ed Morabito, Project Manager

*"Very inspiring and motivational. The leadership clip at the end made me want to save the world."*

– Kelly LeGrett-Norton, Project Manager
